Description	
Hello,	
I really like your plugin. I would like to use it to build some Kanban board in our global wiki page. Everything works quite nice, despite of filtering issues by user. Our Kanban board should have several cols (New, In progress, Test, Deploy) and several rows (User 1, User 2, ...). So every user should have his own "swim lane"/ row to pull/ update tickets. The column data is possible right now, but filtering by user is not.	
So I thought of a user option/switch "-u=USER_ID" to filter the issues by the assigned_to value of the issue. With this option I could implement my Kanban board above smile.png	
Regards, Axel

- Status changed from New to Assigned
- Assignee set to Tomohisa Kusakawa
- Target version set to 0.0.3

#2 - 07/01/2013 12:42 AM - Tomohisa Kusakawa

- Status changed from Assigned to Resolved
- % Done changed from 0 to 100

commit:c5c8f8285eb1

#3 - 07/02/2013 12:55 AM - Tomohisa Kusakawa

- Status changed from Resolved to Assigned

Hi Axel!

Thanks for your good idea.

I further extended, and I thought so that all the items could be used for a additional filter.

Please try beta commit:https://bitbucket.org/kusu/redmine_wiki_lists/downloads

-> Branches tab -> [#1248](#)

<macro format>

```
{{ref_issues(-f:assigned_to_id=89)}}
```

#4 - 07/02/2013 08:48 AM - Axel Böswetter

Hi Tomohisa,

thanks for providing the fast beta branch and thanks for the further extension of the logic smile.png I just pulled the changes and everything seems to work fine.

*Thumbs up

Regards, Axel

#5 - 07/22/2013 12:24 AM - Tomohisa Kusakawa

- Status changed from Assigned to Closed

I released this progression on [Version 0.0.3](#)

Thanks.
