#### Description

#### What steps will reproduce the problem?

1. Install redmine 2.4.2
2. On a [Redmine Settings](#) page set russian language as Default language.
3. Configure redmine project repository.
4. Install and configure Redime Hudson plugin version 2.1.2
5. Open issue that was recently fixed with appropriate issue reference code.

#### What is the expected output? What do you see instead?

On a issue page you can see information about related revisions.  
But there is no information about related builds.

#### Please give us a result of following command.

## Please provide any additional information below.

There is language dependent code in plugin:

redmine\_hudson/assets/javascripts/jquery.build\_result\_appender.js:

```
changeset_refs = jQuery("div#issue-changesets div.changeset:has(a[title^='Revision " +  
revision + "']) div.wiki");
```

In case of russian language title has another word (Редакция), so I was able to fix issue by changing code this way:

```
changeset_refs = jQuery("div#issue-changesets div.changeset:has(a[title~='" + revision + "  
']) div.wiki");
```
