Description

Issue Template allows for the creation of templates with pre-filled Subject/Notes data. Meanwhile, Checklist (by RedmineCRM) allows for the creation of checklist items, below the Notes within Issues. Like a custom field, but a bit more dynamic. It would be AWESOME if these 2 plugins worked together: Template to allow Checklists created as part of the template-building process.

I don't think this would require any changes to Checklist; only need to make Template be aware of the Checklist functions if the plugin was detected as present.

History

#1 - 06/29/2014 09:26 PM - Akiko Takano
- Assignee set to Akiko Takano
- Target version set to Future Release

#2 - 07/29/2016 08:10 PM - Akiko Takano
- Status changed from 新規(New) to 担当(Assigned)

Hi, Bill.
Thank you so much for your request, and I'm sorry I have not implement yet.

Now, I'm trying to handle this feature.
Please see this issue if you still have interesting.

https://github.com/akiko-pusu/redmine_issue_templates/issues/39

#3 - 08/28/2016 09:35 PM - Akiko Takano
- Target version changed from Future Release to ver0.1.3

#4 - 09/06/2016 05:56 AM - Akiko Takano
- Status changed from 担当(Assigned) to 終了(Closed)
- % Done changed from 0 to 100

Hi, Bill.
I've released IssueTemplate v0.1.3, which implements this feature.

If you still have interest about this topic, please clone or download latest source from GitHub repository.
