Hello.
I have "500 Internal Server Error" with my redmine on MSSQL 2012 server.
I found this related issue: #1426. You have fixed this error for MySQL, but you have used too specific syntax that does not work for MSSQL 2012.
I attached the patch for MSSQL 2012, it works for me. But I have not time to create more general solution, for all servers.
Maybe we need to use the power of ORM, instead of having to write code directly.

Environment:
Redmine version 3.3.0.stable
Ruby version 2.0.0-p645 (2015-04-13) [i386-mingw32]
Rails version 4.2.6
Environment production
Database adapter SQLServer

SCM:
Mercurial 3.1.1
Filesystem

Redmine plugins:
clipboard_image_paste 1.10
redmine_default_assign 0.6
redmine_ldap_sync 2.0.8.devel
redmine_work_time 0.3.3

Log:

Started GET "/work_time/show/opr" for 127.0.0.1 at 2017-01-23 14:40:07 +0300
Processing by WorkTimeController#show as HTML
Parameters: {"id"=>"opr"}
Current user: sd557 (id=3)
Completed 500 Internal Server Error in 31ms (ActiveRecord: 15.6ms)
